

Abstract

To be written.

This MMSC thesis will further explore general kernel spectral methods for finding equilibrium measures where initial progress made in [Gutleb, Carrillo and Olver 2020](#) and [Gutleb, Carrillo and Olver 2021](#).

Keywords: Equilibrium Measures

Languages: C++, Julia, Python

Chapter 1

Introduction

Chapter 2

Conclusion

In the present thesis, we explored the interesting realm of particle-particle interactions. Next to the written part, the reader will find an implementation of the particle simulator, including a Graphical User Interface (GUI), as well as the numerical solver.
